Education

NRU HSE NN, 2021-2026

Department of Computer Science, Mathematics and Computer Science

Applied Mathematics and Computer Science

Work Expirience_

Pet-project: C++ chat using the *Winsoklibrary*. Using *multithreading* to allow multiple clients to access the server.

Pet-project: C++ chat on linux. Using multithreading to access multiple clients to a server. Using the boostlibrary, tcp/udpcommunication protocol, asynchronous programming.

Lab work: writing your own smart - pointer, shared - pointer using your own deleter.

Lab work: writing your own calculator with parenthesis expression parsing, unary operations, trigonometric and logarithmic functions, and the ability to enter unknown variables in the following lines.

Skills____

C++: STL, OOP, BOOST, knowledge in multithreading and asynchronic. C++ standarts from 11 to 20.

Python: the skills of writing simple scripts and university programm. Work expirience with ML(numpy, pandas, matplotlib, scipy, seaborn). Work expirience with Flask and Django, using databases.

Git: basic knowledge.

Linux(Ubuntu): the skills of writing simple scripts(bash/sh). Work expirience with system utilities. Work expirience with Docker.

Redactors: VSCode, VisualStudio, FarManager, Clang. Static code analyzers(cppcheck, clang-tidy).

Databases: basic knowledge. Languages: Russian, English(B2).

Other_

For contact: tg: @just_clown

github: @just_clown

Olymic coding: Confident knowledge of algorithms and data structures, quarterfinalist ICPC, the prizewinner of the regional stage

in computer science (20/21)

Andrey Tsyganok
